-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 7, 8, 11-15, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards et al (US 5,025,829) in view of Roth (US 5,080,108) and Farmer et al (US 6,613,036).

Edwards discloses an apparatus and method steps for dispensing light sensitive fluids substantially as claimed except for a first, second, and third opaque fabric member covering the tubing and the bag, and its covering steps.

Roth teaches that it is well known to use a drape to cover non-sterile elements, such as IV tubing, and others. **Farmer** teaches that it is old well known (col. 2) that caregivers used towels or linens to protect the IV bag from light. Given the teachings it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Edwards by providing Farmer and Roth's drape material to cover the IV tubing and the bag, since Roth suggests that it would protect the tubing from contaminants and Farmer suggests that it would protect the bag from light.

Art Unit: 3763

Allowable Subject Matter

3. Claims 6, 9, 10, 16, 19, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.
